

On September 29th, my son and I adopted Swisher, a beautiful brown Tabby from Cat Guardians. I first visited Swisher back in July, in an animal shelter in Wheaton. Later that month I discovered that Cat Guardians had rescued him from that shelter so I followed him to Cat Guardians later that same month.

I knew that Swisher was a special needs cat. He was older, 5-7 yrs old, and had a heart murmur. Cat Guardians took special care of him and took him to a vet right away, and also a vet specialist to determine the extent of his condition. It turned out that his heart murmur was minimal and only required a small amount of medication to control.

Since we already had an older, special needs cat, I knew that Swisher would fit in to our household. He has been a real joy to us. He is calm, unruffled in his new surroundings, and very loving. He lets me hold him like a baby and can still play like a kitten. I can tell he has been well cared for and loved by Cat Guardians. I would recommend this no kill shelter to anyone looking to adopt, and would encourage those who are looking for a great companion to adopt a special needs cat. They seem to appreciate their new owners very much and the love they give back is very rewarding.
